

Vadym Oliinyk

Angular Frontend Developer

oleinikvadim@gmail.com | +380955610653 | Telegram | LinkedIn
Kharkiv, Ukraine

Summary:
Frontend Developer with 5+ years of professional IT experience specializing in Angular ecosystem, TypeScript, and state management solutions. Proactive team player focused on building scalable web applications, optimizing workflows, and modernizing legacy codebases. Quick to adapt to new technologies and business requirements to deliver reliable, high-performance solutions.

Core Competencies

- **Frontend:** Angular (10+), TypeScript, RxJS, NgRx (Store/Effects/Signals), Angular Material, Bootstrap, Angular CDK, Nx Monorepo, @rx-angular, Capacitor, ECharts / ngx-echarts, JavaScript (ES6+), HTML5/CSS3/SCSS
- **Code Reading:** C# (Code Reading & Logic Comprehension)
- **Tools & Engineering Practices:** Git, Git-flow, PR Reviews, REST APIs

Professional Experience

Middle Web Developer | *DevPace*

May 2023 – Present | Kharkiv, Ukraine (Remote)

- Participated in legacy code modernization, improving overall application performance and maintainability.
- Developed new product modules based on specifications and documentation.
- Integrated state management using NgRx (Store, Effects, Signals) and RxJS for complex workflows.
- Navigated and read C# backend codebases to analyze business logic, trace data flows, and align API integrations.
- Contributed to code quality through structured Git-flow practices and detailed Pull Request reviews.

Frontend Developer | Kharkivoblenergo Mobile

May 2025 – Present | Kharkiv, Ukraine (Remote, Volunteer)

- Volunteered as a frontend developer on Kharkivoblenergo Mobile, a civic mobile application (Angular + Capacitor, Android/iOS) for the regional power utility's consumers and employees.
- Participated in building the application from the ground up and continue to extend its functionality with new features, including push notifications, address lookup, and employee access history.
- Provide ongoing support and maintenance — bug fixes, backend-driven API updates, and cross-platform (Android/iOS) reliability.
- Built and maintained the Angular data-access layer (Nx monorepo) — typed DTOs, enums, and REST API client services.

Junior Angular Developer | *Ristars*

Mar 2021 – Mar 2023 | Kharkiv, Ukraine (On-site)

- Developed responsive, cross-browser compatible web applications using Angular, TypeScript, CSS3, and legacy JavaScript/jQuery.
- Built reusable UI component libraries and optimized layout rendering across multiple devices.
- Collaborated with designers deliver functional user interfaces.

Languages

- **English:** A2 (Pre-Intermediate — proficient in technical reading & documentation)
- **Ukrainian:** Native
- **Russian:** Fluent

Education:

V. N. Karazin Kharkiv National University | Karazin University
Tourism and Travel Services Management (2009-2015)
